EG's RPO Solutions Fills 180 Positions for Retail Expansion

Situation

A large retailer has been expanding rapidly, opening three new stores each year over the past decade. Each store required six meat cutters, and as the company grew, they faced the challenge of consistently sourcing, screening, and hiring qualified meat cutters for their new locations.

Solution

To address these challenges, they partnered with EG to implement a comprehensive Recruitment Process Outsourcing (RPO) solution. Leveraging years of experience in RPO, our dedicated team of Talent Strategists—consisting of recruiters, sourcing specialists, and new-hire retention experts—was assembled to streamline the hiring process. The team was regionally assigned, tailoring our market-by-market effectiveness to ensure each store was staffed with qualified meat cutters, reducing hiring time and increasing placement accuracy.

Results

Filled 180 meat cutter positions over 10 years

Reduced hiring time for new store openings

Improved placement accuracy, ensuring qualified candidates were hired
